**SPECIFICATION**

- **Nomenclature:** Electric EEL ( Drain cleaning tools USA)
  - **MODEL 800 HYDROSTATIC SEWER CLEANER or Equivalent.**

The Model 800 Hydrostatic Sewer Cleaner is professionally engineered to clean 4” -24” diameter pipelines for distances up to 650 ft. The Model 800 features infinitely variable drive speeds and an automatic transmission.

A convenient hand lever controls the infinitely variable cleaning speeds at full torque from 50 to 1.000 RPM. The unit runs 8ft. sectional heavy-duty self-feeding “municipal” cables that requires no handing by the operator and allows for faster cleaning.

The 8 ft. Sectional Municipal Cables were specially designed for this machine. These are constructed of a right hand wound outer coil and a 5/8” diameter left hand wound inner coil, both anchored to the coupling, which reduces helixing and loss of cables in pipeline. The 5/8” inner cable provides added stiffness which allows or longer runs in larger pipelines. The open space outer coil helps loosen deposits and auger them back.

Patented Snap-lock coupling provide easy and dependable joining of the 8ft. (2.45m) heavy-duty cable sections with no set screws, nuts or loose pines. An 8 HP gasoline engine or optional 9 HP diesel engine provides more horsepower than any comparable model. Removable handle for compact storage and transport.
